## Single point load cell H60N

### Robust aluminium load cell

The H60N are platform load cells with parallel guide and central bending eye made of stainless steel. The fully welded construction makes them ideal for use in the chemical industry, food industry and similar industries. As standard, the H60N load cells are tested and optimised for corner load sensitivity. This means that no measuring errors occur even if the platform is only loaded at one corner.

The H60N load cell is legal for trade up to 3000D according to OIML, R60, and delivers extremely precise and reproducible measurement results even in long-term use in harsh industrial environments. The load cell is laser-welded and meets the requirements of protection class IP65.
