## Shear beam load cell K10S

### Flat shear beam load cell for industrial scales

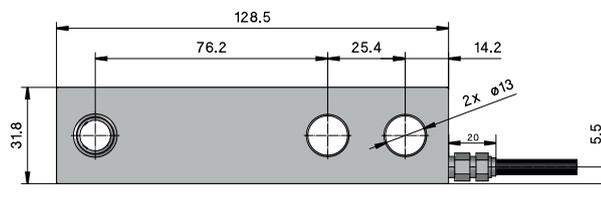

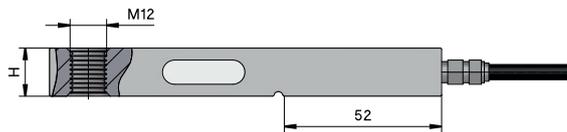

The K10S low profile shear beam load cells have been developed as a low profile alternative to the existing shear beam load cells. The load cells are made of high-alloy, nickel-plated tool steel and are characterised by high accuracy and linearity.

The K10S load cells deliver extremely precise and reproducible measurement results even in long-term use in harsh industrial environments and meet the requirements of protection class IP65.
